To Whom It May Concern:

I am please to offer the highest recommendation for Heritage Contracting and Mr. Bob Strobo. Bob is building the new digital transmission facility for KEYE Television. As in all projects this has been one of hurry up and wait. Bob has gone above and beyond in getting this project done in spec and on deadline. Not only has he done some tremendous value engineering that has save my company a good deal of money, the quality of the building has far exceeded all of the required specs. Our station is owned by CBS and our company representative from New York has been very impressed with both the quality and timeliness of the work Bob has done for us. This job is being used as the benchmark of excellence for other CBS stations.

Bob's work has compared and exceeded our company experience in many larger television markets. The work has been beyond reproach and the hassle factor almost nonexistent. When Bob tells you that he will do what you need, and at the same time be looking out for the best value for your dollar, you can believe it.

Feel free to call me with any questions you might have. I can be reached at 512 490-2103.
